3g wireless networks by pdf - 3G,
short for third generation, is the
third generation of wireless
mobile telecommunications
technology. It is the upgrade for
2G and 2.5G GPRS networks, for
faster internet speed. This is
based on a set of standards used
for mobile devices and mobile
telecommunications use services
and networks that comply with
the International Mobile
Telecommunications-2000
(IMT-2000) specifications by the

GMT 3G - Wikipedia - 4G is the
fourth generation of broadband
cellular network technology,
succeeding 3G. A 4G system must
provide capabilities defined by
ITU in IMT Advanced. Potential
and current applications include
amended mobile web access, IP
telephony, gaming services,
high-definition mobile TV, video
conferencing, and 3D television..
