fluid dynamics, a stall is a
reduction in the lift coefficient
generated by a foil as angle of
attack increases. This occurs
when the critical angle of attack
of the foil is exceeded.

Stall (fluid mechanics) - Wikipedia -
The center of pressure is the point
where the total sum of a pressure
field acts on a body, causing a
force to act through that point.
The total force vector acting at
the center of pressure is the value
of the integrated vectorial
pressure field.
